

# Reduce emergency overcrowding with a fast, safe redirection process

99.6% of nurses feel comfortable using this solution

130 health care facilities use the solution

+200K patients redirected in Quebec and France

Logibec Emergency Redirection helps to safely identify non-urgent cases that can be redirected to a partner medical clinic to reduce emergency department overflow.

## ASSESSING PATIENTS AT THE EMERGENCY DEPARTMENT

Using a proven algorithm that includes 50 common complaints, the solution helps triage professionals assess whether the patient is eligible to be safely redirected in just 30 seconds.

## SELECTING A PARTNER CLINIC

The triage professional selects the most appropriate clinic using interactive maps and an intuitive interface.

## PATIENT SUPPORT

The patient leaves the emergency department with a referral number, the date and time of their appointment, and a map to the selected partner clinic, with priority given to their family physician.

## MEDICAL APPOINTMENTS AT A CLINIC

The patient is booked for a medical appointment at a time slot set aside or redirected patients and managed independently by the partner clinic.

15%

of ambulatory patients are eligible to be redirected

92%

of eligible patients agree to be redirected\*

94%

of redirected patients show up to their appointment\*\*
