# Upgrade Logibec FMS to modernize your financial management

The technology upgrade involves upgrading the Logibec FMS and Logibec MMS solutions to merge and optimize their databases. The upgrade improves the speed and overall performance of your financial and material management tools and gives you access to new features.

## Key benefits of the upgrade

### Simplified telework

The solution is accessible remotely and updates are easier to deploy to the client environment.\*

### Increased speed and performance

Merging the FMS and MMS databases boosts system performance and speed.

### Access to future web modules

The new technology gives access to the Web Budget modules and other future web modules.

### Enhanced user experience

Users can benefit from more than 180 interface enhancements and new features.

\* Via web and non-cloud elements

Request a customized demo of the Web Budget module or learn more about the steps involved in the technology upgrade
